

Packet Tracer - Use Telnet and SSH exercise from CISCO course

Here is the topology

Step 1: Telnet

- At the prompt, enter the command telnet 64.100.1.1 to gain access to the router

```
Cisco Packet Tracer PC Command Line 1.0
C:\>telnet 64.100.1.1
Trying 64.100.1.1 ...Open

[Connection to 64.100.1.1 closed by foreign host]
C:\>
```

The connection is failed because of unauthorized access via telnet.

Step 2: SSH.

The router is configured to not allow insecure Telnet access, so we have to use SSH with password in the exercise.

```
C:\>ssh -l admin 64.100.1.1

Password:

HQ#
```
